## **Succession Planning II**

# Valuing Your Bookstore

# BEA Workshop

May 31, 2003

- 1. Allow ample preparation time
- 2. Develop a thorough sales document
- 3. Know your ideal buyer and transaction
- 4. Use professionals as needed
- 5. Make an orderly transition

- 1. A Tale of Two Stores
- 2. Four valuation approaches
- 3. Common valuation issues
- 4. Sample results including three actual sales

Cora's Corner

## Barney's Booksmith

#### **Cora's Corner**

| Revenues             | \$300K |
|----------------------|--------|
| Net inventory cost   | \$50K  |
| Other net assets     | \$10K  |
| Owner's comp         | \$25K  |
| EBIT                 | \$9K   |
| Pre-tax capital cost | 12%    |
| Proj EBIT growth     | 0%     |
| Value                | ???    |

- Small store on Jersey Shore
- 7 years old
- Seasonal trade
- Cora was successful on Wall Street
- Bruce Springsteen gets his lyrics here

#### **Barney's Booksmith**

| Revenues             | \$1.2 mm |
|----------------------|----------|
| Net inventory cost   | \$200K   |
| Other net assets     | \$10K    |
| Owner's comp         | \$125K   |
| EBIT                 | \$30K    |
| Pre-tax capital cost | 12%      |
| Proj EBIT growth     | 1%       |
| Value                | ???      |

- Mid-size college-town store in Austin
- Strong customer resistance to chains
- 22 year history
- Larry McMurtry buys his used books here

- 1. A Tale of Two Stores
- 2. Four valuation approaches
  - A. Market Approach
  - B. "Horse Trading"
  - C. Cash Flow Method (earnings-based)
  - D. Excess Earnings Method (asset- and earnings-based)
- 3. Common valuation issues
- 4. Sample results

Business Valuation Body of Knowledge

Exam Review and Professional Reference

Shannon P. Pratt

- 1. Based on universe of comparables
  - a) Similar entities in similar locations
  - b) Public companies in same business
- 2. Similar to a real estate appraisal
- Shortage of comparables for independent bookstores

- 1. Common starting place because it requires the least work
- 2. Based on each side's experience and feel
- Very difficult to establish a positive transaction where both sides believe that the deal is fair
- 4. High potential to result in a dead deal

- Assumes business is like an investment in a stock or bond – it is worth the present value of estimated future cash flows
- 2. Simplified process:
  - a) Estimate a normal EBIT
  - b) Estimate the expected capital cost
  - c) Estimate expected annual growth rate for the business over time
  - d) Subtract c) from b) and divide into a)

Normal EBIT

Capital Cost – Projected Growth Rate

#### **D – Excess Earnings Method**

- 1. Assumes business is worth value of net tangible assets plus or minus an adjustment for earnings in excess of those needed to support the investment in the assets
- 2. Simplified process:
  - a) Calculate net tangible assets
  - b) Estimate a normal EBIT
  - c) Estimate capital cost to justify the net tangible asset investment (often lower than average cost of capital)
  - d) Estimate expected capital cost for the excess earnings (often higher than average cost of capital)
  - e) Add a) plus [[b) less multiplication of a) times c)] divided by d)]

Net Tangible Assets + -

(Normal EBIT – (Net Tangible Assets × Net Asset Capital Cost))

Excess Earnings Capital Cost

- 1. A Tale of Two Stores
- 2. Four valuation approaches
- 3. Common valuation issues
- 4. Sample results

- Assets/inventory at cost or market?
- Reasonable capital costs?
- Reasonable owner's compensation?
- Growth rates based on history, competitive environment, or plans?
- Influence of risk and uncertainty on the final calculation?

- 1. A Tale of Two Stores
- 2. Four valuation approaches
- 3. Common valuation issues
- 4. Sample results

## Cora's Corner

- Cash flow method: \$75,000
- Excess earnings method: \$84,000
- Barney's Booksmith
  - Cash flow method: \$682,000
  - Excess earnings method: \$626,000

| Revenues             | \$300K   |
|----------------------|----------|
| Net inventory cost   | \$50K    |
| Other net assets     | \$10K    |
| Owner's comp         | \$25K    |
| EBIT                 | \$9K     |
| Pre-tax capital cost | 12%      |
| Proj EBIT growth     | 0%       |
| Value                | \$75,000 |

## **Cash Flow Method**

- Owner's comp is at market, so no adjustment
- Normal EBIT = \$9K
- Pre-tax capital cost less expected growth 12%-0% = 12%
- Value: \$9K/12% = \$75,000

| Revenues             | \$300K   |
|----------------------|----------|
| Net inventory cost   | \$50K    |
| Other net assets     | \$10K    |
| Owner's comp         | \$25K    |
| EBIT                 | \$9K     |
| Pre-tax capital cost | 12%      |
| Proj EBIT growth     | 0%       |
| Value                | \$84,000 |

## **Excess Earnings Method**

- Owner's comp is at market, so no adjustment
- Net tangible assets = \$60K
- Justification for NTA investment at 9% = \$5.4K
- Excess earnings: \$9K \$5.4K = \$3.6K
- Value: \$60K NTA + \$3.6K/15% = \$84,000

| Revenues             | \$1.2 mm  |
|----------------------|-----------|
| Net inventory cost   | \$200K    |
| Other net assets     | \$10K     |
| Owner's comp         | \$125K    |
| EBIT                 | \$30K     |
| Pre-tax capital cost | 12%       |
| Proj EBIT growth     | 1%        |
| Value                | \$682,000 |

## **Cash Flow Method**

- Owner's comp is high, so \$45K moved to earnings
- Normal EBIT is \$30K + \$45K = \$75K
- Pre-tax capital cost less expected growth 12%-1% = 11%
- Value: \$75K/11% = \$682,000

| Revenues             | \$1.2 mm  |
|----------------------|-----------|
| Net inventory cost   | \$200K    |
| Other net assets     | \$10K     |
| Owner's comp         | \$125K    |
| EBIT                 | \$30K     |
| Pre-tax capital cost | 12%       |
| Proj EBIT growth     | 1%        |
| Value                | \$626,000 |

## **Excess Earnings Method**

- Owner's comp is high, so \$45K moved to earnings
- Net tangible assets = \$210K
- Justification for NTA investment at (9%-1)%= \$16.8K
- Excess earnings: \$75K \$16.8K = \$58.2K
- Value: \$210K NTA + \$58.2K/(15%-1%) = \$626,000

| Revenues             | \$550K |
|----------------------|--------|
| Net inventory cost   | \$45K  |
| Other net assets     | \$25K  |
| Owner's comp         | \$30K  |
| EBIT                 | \$14K  |
| Pre-tax capital cost | 12%    |
| Proj EBIT growth     | 0%     |
| Value                | \$117K |

### **Cash Flow Method**

- Owner's comp is at market, so no adjustment
- Normal EBIT = \$14K
- Pre-tax capital cost less expected growth 12%-0% = 12%
- Value: \$14K/12% = \$117,000
- Actual sales price = \$111K

| Revenues             | \$550K | Excess Earnings Method  |
|----------------------|--------|---|
| Net inventory cost   | \$45K  | <ul> <li>Owner's comp is at<br/>market, so no adjustment</li> </ul>     |
| Other net assets     | \$25K  | <ul> <li>Net tangible assets =<br/>\$70K</li> </ul>                     |
| Owner's comp         | \$30K  | <ul> <li>Justification for NTA<br/>investment at 9% = \$6.3K</li> </ul> |
| EBIT                 | \$14K  | <ul> <li>Excess earnings: \$14K –<br/>\$6.3K = \$7.7K</li> </ul>        |
| Pre-tax capital cost | 12%    | <ul> <li>Value: \$70K NTA +<br/>\$7.7K/15% = \$121,000</li> </ul>       |
| Proj EBIT growth     | 0%     | <ul> <li>Actual sales price =</li> </ul>                                |
| Value                | \$121K | \$111K  |
